CREA-MAKER

WHERE CREATIVITY TAKES SHAPE

COMPANY PROFILE

BROCHURE 2024 - 2025

DECORATIONS*

Discover our 3D-printed decorations designed to add a modern and artistic touch to any space. Combining creativity with practicality, our customizable designs offer endless possibilities to enhance your decor.

VASE

* Can be customized in every detail, from color to shape.

OUR SERVICES

Our services encompass a range of cutting-edge solutions, tailored to meet the diverse needs of your projects. We provide everything from initial design to final production, ensuring each step is handled with care and attention to detail.

3D Scanning & Design

3D scanning is the process of capturing the physical characteristics of an object or environment and converting them into a digital model.

3D Printing

We provide 3D printing services using a variety of the latest 3D printers for FDM and Resin printers, capable of producing any shape in any color and material.

Laser Cut & Engraving

Our advanced technology delivers detailed results for custom designs and intricate patterns. Working with wood, acrylic, metal, and more.

CNC Machining

CNC machining is a subtractive manufacturing process that uses computer-controlled machines to remove material from a workpiece to create a desired shape.

Electronic Circuits & PCB

Discover our comprehensive electronic circuit solutions, including design, simulation, PCB design, and assembly services.

Jewelry Design

At Crea-Maker we offer a wide variety of jewelry design services that transform your creative ideas into exquisite pieces of wearable art.

3D Printers & Filaments

At Crea-Maker we offer a comprehensive range of 3D printers, filaments and related accessories and consumables.

Customer Service & Training

Crea-Maker customer services involves timely, friendly, and effective communication, addressing customer needs and resolving issues efficiently.

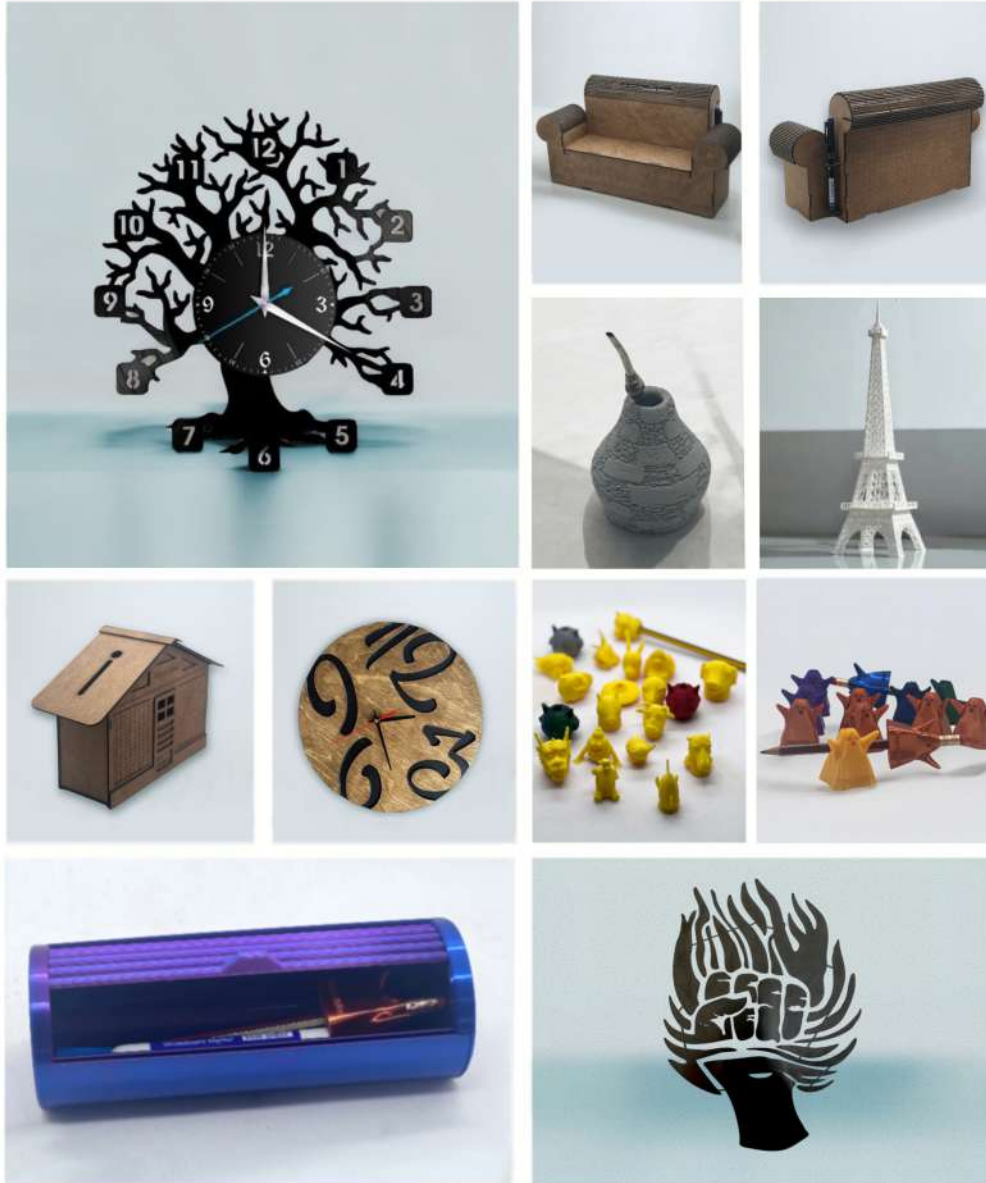

Injection Molding

This process involves injecting molten plastic material into a molden cavity, where it cools and solidifies to form the desired shape. The mold typically consists of two halves and the material is injected under high pressure.

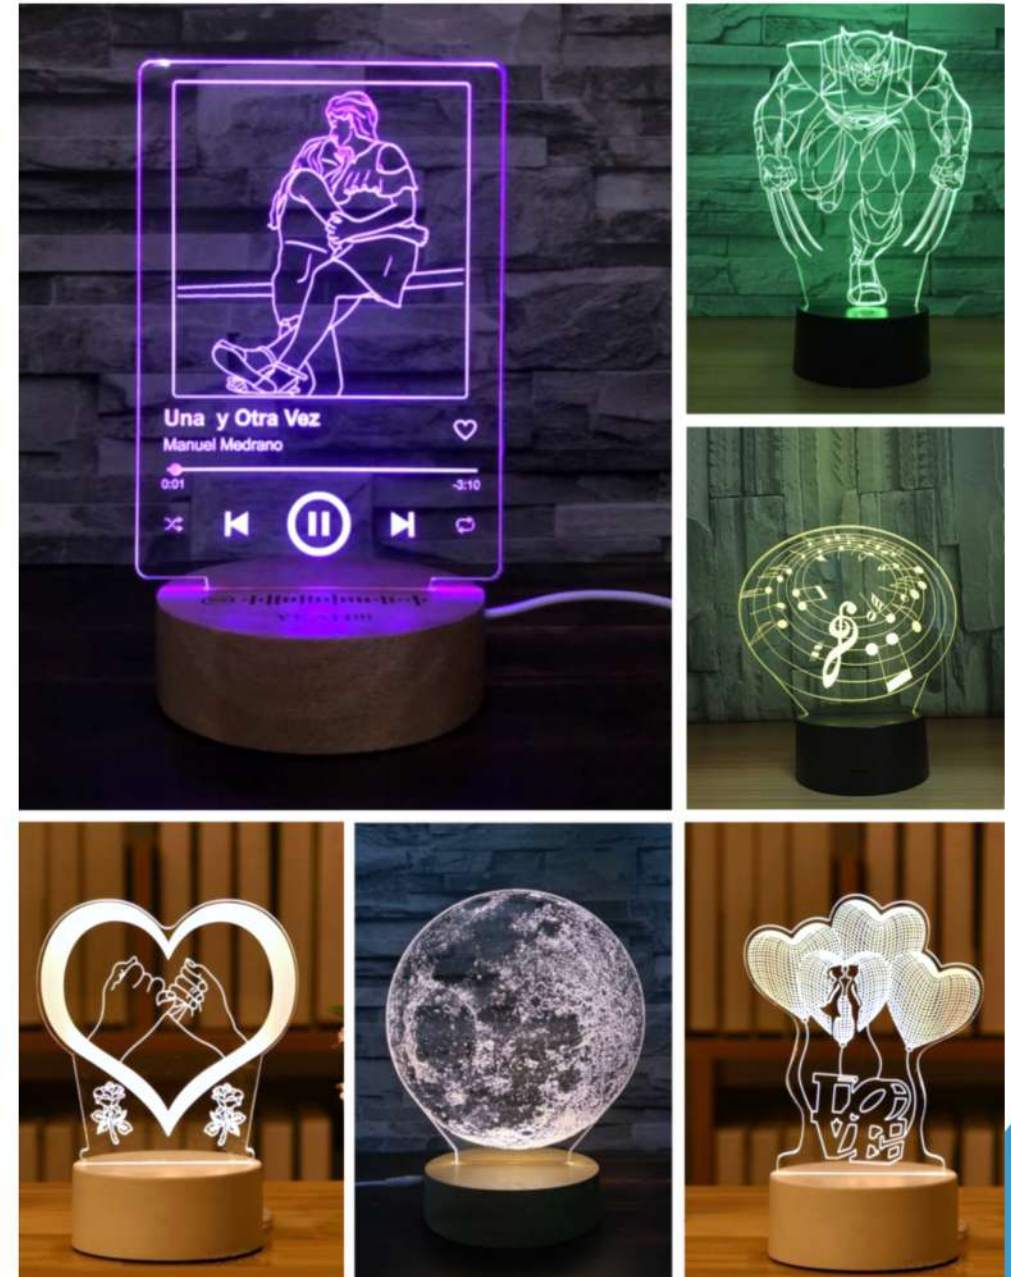

VARIOUS ARTS *
